Learning

TypeScript, JavaScript Classes, Tailwind, SASS, Full-stack development, REDUX, Ruby / Rails

Work Experience

Front-End Supervisor
Sprouts Farmers Market • Austin, TX
April 2024 - Current

- Oversee all team members on the front-end of the store.
- Worked independently and as a team to maintain all expectations put forth by the store manager and Sprouts core values which is a key aspect of effective software/application development.
- Collaborate with other departments to reach sales goals and store maintenance requirements.
- I was Team Member of the Month for August.
- Source of knowledge and foundation for team members who experience issues relating to their work.
- Always willing to assist in all other departments as necessary, stocking, cleaning, organizing back-stock, etc.
- Always seeking constructive feedback for my development.

Commercial Lines Processing Specialist
Progressive Insurance • Austin, TX (remote)
February 2019 - August 2023

- Started out as a call center rep (2 yrs) and worked my way over to the processing department (2 yrs).
- I helped both internal and external customers. I solved all sorts of problems ranging from flat out complaints on service to premium discrepancies and technical issues with company systems.
- I participated in virtual roaming which was a zoom-style group chat where team members could ask questions. I would then call them on Skype and we would share screens back and forth and resolve all of their issues.
- Was consistently a top performer with efficiency and accuracy of completed work items. (averaging 3-4 minutes per work item vs company average of around 6-10 mins)
- Excelled working in virtual teams to solve problems and mentor team members—skills directly applicable to remote software development environments.
- I ended up resigning to pursue an opportunity to play music professionally which was a life-long passion of mine.

Refunds/Membership Clerk, Cashier, Supervisor
Costco • Austin, TX
March 2008 - November 2017

- Started as a front-end assistant where I did everything from stocking, assisting cashiers, carts, front/facing products on the floor.
- Moved to the membership/refunds department where I consistently met sales goals selling membership cards & (at the time) AMEX cards exclusive for Costco members.
- I mastered all the systems we used for creating/maintaining memberships and looking up inventory as well as the special refunds-only cash register system. I was consistently a go-to for supervisors and managers who didn't use these systems as much as I did.
- During my last few months here I was promoted to Supervisor of the membership/refunds department.
- I oversaw all team members: I identified and applied coaching strategies to help them reach sales goals as necessary. I held the responsibility of writing the department schedule for all team members. I handled member complaints with empathy and was always ready to find a way to satisfy their needs.
- I seeked out constructive feedback for my professional development.
- I ended up resigning to pursue self employment.

Hobbies & Interests

I am passionate about front-end development, music, and nature. In my free time, I enjoy coding personal projects and exploring creative outlets like music composition.
